

CAREER PROFILE

Summarise your career here lorem ipsum dolor sit amet, consectetur adipiscing elit. Aenean commodo ligula eget dolor aenean massa. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus. Donec quam felis, ultricies nec, pellentesque eu. Second paragraph if required.

PROFESSIONAL EXPERIENCE

R&D Project Manager and Machine Learning Engineer

July 2020 - Present

Hexagon, Switzerland

Describe your role here lorem ipsum dolor sit amet, consectetur adipiscing elit. Aenean commodo ligula eget dolor. Aenean massa. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus. Donec quam felis, ultricies nec, pellentesque eu, pretium quis, sem. Nulla consequat massa quis enim. Donec pede justo. Sed ut perspiciatis unde omnis iste natus error sit voluptatem accusantium doloremque laudantium, totam rem aperiam, eaque ipsa quae ab illo inventore veritatis et quasi architecto beatae vitae dicta sunt explicabo.

EDUCATION

PhD in Geotechnologies applied to Construction, Energy and Industry

2013 - 2017

University of Salamanca

Development of Computer Vision solutions for the automatic analysis of geomatic products (LiDAR/Photogrammetric Point Clouds and Multispectral Imagery) applied to the management of energy resources.

- Bullet point a
- Bullet point b

MSc in Cartographic Geotechnologies applied to engineering and Architecture

2012 - 2013

University of Salamanca

Luis López Fernández

R&D Project Manager and Machine Learning Engineer

COMPLEMENTARY EDUCATION

Artificial Intelligence Nanodegree and Specializations by Udacity - In this program, I learnt essential Artificial Intelligence concepts from AI experts like Peter Norvig and Sebastian Thrun, that can be applied to many fields like Natural Language Processing, Computer Vision or Predictive Maintenance, among others. I completed projects and exercises incorporating search, optimization, planning, and probabilistic graphical models which have been used in Artificial Intelligence applications for automation, logistics, operations research, and more.

Agile Software Development Nanodegree by Udacity - In this program, I learnt how to build products that deliver continuous value to customers using an Agile approach to software development. I worked with agile strategies like Scrum, Kanban and XP, that can be used to create an environment that fosters high performing teams, and manage iteration planning using Agile techniques. I worked on the creation of a release plan for a Minimum Viable Product, creating metrics that show project status, and designing communication strategies to effectively communicate progress both within and outside of the development team.

Project Management Professional Certificate by Google - In this program, I got an immersive understanding of the practices and skills needed to succeed in a project management role. I learnt how to create effective project documentation and artifacts throughout the various phases of a project. I worked with the foundations of Agile project management, with a focus on implementing Scrum events, building Scrum artifacts, and understanding Scrum roles. Additionally, I practiced strategic communication, problem-solving, and stakeholder management through real-world scenarios.

Blockchain Developer Nanodegree by Udacity - In this program, I learnt the fundamentals of the blockchain platform, working both with the Bitcoin and Ethereum protocols. I created my own private blockchain, and secured digital assets using blockchain identity capabilities. I explore the Ethereum platform and used Solidity and smart contracts to develop my own decentralized apps. I built projects for real-world applications, and gain the essential skills for a career in this dynamic space.

Additional training - A detailed list of additional training can be found in the next link.
